IEG PI NOTICE

No. 53-75

TITLE/SIGNIFICANCE:

Electronics Support Vans Associated with the Kapustin Yar A and B Radars

COMMENT: The electronics support vans associated with the KY A and B radars are unique in that their cores are extendable. The function of these vans has not been determined. The photograph shows 12 of these vans with their cores in variously extended positions. Three of the vans shown have a probable air conditioning unit at the rear of the van and three vans have a peaked-roof canvas cover. Vans similar to these have been observed at Andreyev Radar R&D Test Facility
